

# Retail Concessions Management Tool

A web-based system to manage retail concession leases & inspections.

This mobile application was developed by TRA to allow property managers and inspectors an easy to use tool for on the road use:

- ✓ Search and update tenant information for all concession spaces in the system
- ✓ Search and update concession space inspections, including adding photos, from the concession sites
- ✓ View libraries of station layout plans and concession space plans
- ✓ View libraries of vendor badge photos and vendor security check forms
- ✓ Input inspections, pictures and follow up notes in real time while on the site.

The system is secure, web-based and password protected, so access can be restricted to a designated user group.

Administrators can also generate a variety of reports including renewal pipelines and inspection issues.
